

- Q.1) SAP HANA database is ____
- A. A sort of SAP GUI used to access SAP servers.
 - B. A general purpose ANSI compliant in-memory database. (correcta)
 - C. Used to store mountains of OLAP data.
 - D. A hardware product made by hardware manufacturers.
- Q.2) What is SAP HANA Appliance?
- A. It is a combination of software from SAP and certified hardware from vendors like Dell, IBM, Cisco, Fujitsu. (correcta)
 - B. It is a piece of hardware from vendors like Dell, IBM, Cisco, Fujitsu.
 - C. Is solely produced by SAP AG only.
 - D. It is a combination of BI, BOBJ and HANA.
- Q.3) What BI standards does HANA support? (3 correct answers)
- A. ODBC (correcta)
 - B. JDBC (correcta)
 - C. MDX (correcta)
 - D. MIME
- Q.4) Can SAP HANA database be used by any application, other than SAP?
- A. Yes
 - B. No (correcta)
- Q.5) SAP HANA server can be accessed by _____
- A. SAP GUI
 - B. Any web browser
 - C. Only Internet Explorer
 - D. HANA Studio (correcta)
- Q.6) What method is used to extract tables from ECC server in real time?
- A. SLT based table data provisioning (correcta)
 - B. Information Design Tool (IDT)
 - C. BI R3 extraction services
 - D. None of the above
- Q.7) Which one of the following are components of SAP HANA Studio?
- A. Navigator
 - B. Job Log
 - C. Where-Used List
 - D. All of the above (correcta)

- Q.8) How many perspectives are available in SAP HANA Studio?
- A. 4
 - B. 8 (correcta)
 - C. 9
 - D. 10
- Q.9) Which perspective is used to create joins?
- A. Administration & Modeling
 - B. Debug & Modelling
 - C. Modeler (correcta)
 - D. All of the above
- Q.10) The SAP HANA system can be created within _____
- A. Modeler
 - B. Resource
 - C. Navigator (correcta)
 - D. SAP GUI
- Q.11) Can we create multiple connections to the same SAP HANA system?
- A. Yes (correcta)
 - B. No
- Q.12) The login user who has maximum authorizations in a SAP HANA database is _____
- A. SYS
 - B. SYSTEM (correcta)
 - C. Administrator
 - D. Root
- Q.13) Can the attribute views be created with 1 table?
- A. Yes (correcta)
 - B. No
- Q.14) By default, the maximum number of rows displayed from a table is _____
- A. 1000
 - B. 5000 (correcta)
 - C. Unlimited
 - D. None of the Above
- Q.15) For faster reads, SAP HANA reads the tables column wise.
- A. True (correcta)
 - B. False

- Q.16) Using SAP HANA Studio, table can be _____, _____, _____ (3 correct answers)
- A. Created manually (correcta)
 - B. Created using SQL (correcta)
 - C. Replicated from other systems (correcta)
 - D. Just copied from other systems
- Q.17) When Administration Console is the perspective selected, which of the following can be viewed under HANA system?
- A. Catalog (correcta)
 - B. Content
 - C. Both of them
 - D. None of them
- Q.18) Ultimately, SAP HANA database will replace all databases used in BI/BW, ECC and all other SAP Systems.
- A. True (correcta)
 - B. False
- Q.19) In the SAP HANA Studio the physical tables are stored _____
- A. Under Catalogs (correcta)
 - B. Under Content
 - C. In both
 - D. Nowhere
- Q.20) When deleting a table, what options can be selected? (2 correct answers)
- A. Delete Catalog Object (correcta)
 - B. Delete All Rows (correcta)
 - C. Drop The Table
 - D. All of the above
- Q.21) Users are created under _____
- A. Catalog (correcta)
 - B. Content
 - C. Any of them
 - D. None of them
- Q.22) Can SAP HANA run on SUSE Linux?
- A. Yes (correcta)
 - B. No
- Q.23) The option to send a table from Quality Assurance System to Production System is _____

- A. Use CTS+
- B. Use Import from Quality Assurance System
- C. Use Export from Quality Assurance System (correcta)
- D. Use Transport Management System

Q.24) To create a user, we have to _____

- A. Use T-Code SU01
- B. Use T-Code SU10
- C. Use Users folder under Authorization in Catalog (correcta)
- D. Use Users folder under Authorization in Content

Q.25) Which user has privileges to Root Package?

- A. SYS
- B. SYSTEM (correcta)
- C. Both of the above
- D. Administrator

Q.26) Which role is specifically assigned to a user involved in creating views?

- A. SAPSR3_POWER_USER
- B. PUBLIC
- C. MODELING (correcta)
- D. None of the above

Q.27) SAP HANA system is memory based and persistent storage is not necessary.

- A. True
- B. False (correcta)

Q.28) SAP HANA contains OLAP data in the memory.

- A. True
- B. False (correcta)

Q.29) When you are creating a SAP HANA system in the SAP HANA Studio, a user should be used as the logon user. SYSTEM can be the only user for this purpose.

- A. True
- B. False (correcta)

Q.30) If you have only one SAP HANA system physically, then you can create only one HANA system icon in the SAP HANA Studio.

- A. True
- B. False (correcta)

- Q.31) SAP HANA database is _____
- A. Oracle based
 - B. Sybase based (correcta)
 - C. MS SQL based
 - D. Informix based
- Q.32) Joins are created under _____
- A. Content (correcta)
 - B. Catalog
 - C. Schema
 - D. Authorization
- Q.33) In SAP HANA Studio, HANA systems can be created under nested folders identical to the departments in your company.
- A. True (correcta)
 - B. False
- Q.34) Calculation Views can be created under _____
- A. Schema
 - B. Content (correcta)
 - C. Catalog
 - D. HANA System
- Q.35) Calculation Views have 2 view types. They are _____, _____ (2 correct answers)
- A. Graphical (correcta)
 - B. SQL Script (correcta)
 - C. Analytic
 - D. Attribute
- Q.36) Attribute View types are _____
- A. Standard
 - B. Time
 - C. Derived
 - D. All of the above (correcta)
- Q.37) Whenever a user is created, then a schema is created for that user.
- A. True (correcta)
 - B. False
- Q.38) Whenever a user is created, a package is created for that user.
- A. True
 - B. False (correcta)

Q.39) Every user created at the OS level will be automatically created in the SAP HANA system as well.

- A. True
- B. False (correcta)

Q.40) Views are stored under the schema _____

- A. _SYS_BIC (correcta)
- B. SYS_BI
- C. SYS_REPO
- D. SYS
